

Hafiz Muhammad Anas Majid

AI & Full-Stack Developer · Computer Science Student

+92 322 453 6877 | hafizanasmajid2006@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

AI & Full-Stack Developer with hands-on experience in both machine learning and production web development. Built and compared 5 ML models plus an ANN using Python, scikit-learn, and TensorFlow for a diabetes prediction system. Also delivered a production-grade blogging platform during a full-stack internship at P2P Clouds. Currently pursuing a BS in Computer Science at UMT Lahore with active coursework in AI, Data Science, and Data Mining. Looking to contribute to real-world AI and LLM-powered projects.

EXPERIENCE

Full-Stack Developer Intern · [P2P Clouds](#)

Jul 2025 – Sep 2025

Lahore, Pakistan

- Built a production-grade Medium-style blogging platform from scratch using Next.js, React, Tailwind CSS, Redux Toolkit, Firebase, and Cloudinary over a 3-month internship.
- Integrated third-party APIs (Firebase Auth, Firestore, Cloudinary) to power authentication, media storage, and real-time data — directly applicable to LLM and AI API integration patterns.
- Implemented end-to-end features: blog CRUD, rich-text editing via Editor.js, image uploads, comments, likes, saved posts, and category filtering across 5+ major feature modules.
- Designed a clean, responsive UI and collaborated with a team using Git and version control workflows throughout the project lifecycle.

Customer Service Representative · [Frustech](#)

Oct 2023 – Dec 2024

Lahore, Pakistan (Full-Time)

- Handled customer inquiries and resolved technical and non-technical issues via chat, email, and phone.
- Maintained high client satisfaction through professional communication and timely issue escalation.

EDUCATION

BS Computer Science · University of Management and Technology (UMT)

Nov 2023 – Present

Lahore, Pakistan

Relevant Coursework: Data Structures & Algorithms, Database Systems, OOP, Software Engineering, Machine Learning, Data Science, Data Mining, Artificial Intelligence

Certificate — Full Stack Web Development

Nexskills, Arfa Kareem Tower, Lahore · HTML, CSS, Bootstrap, JavaScript, React.js, Node.js, Express.js, MongoDB

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, HTML5, CSS3

AI / ML: scikit-learn, TensorFlow / Keras, pandas, NumPy, Matplotlib, Seaborn; OpenAI / Gemini API Familiarity

Frontend: Next.js, React.js, Tailwind CSS, Redux Toolkit, Bootstrap

Backend: Node.js, Express.js, Firebase (Auth & Firestore), MongoDB, REST APIs

Tools & Platforms: Git / GitHub, Cloudinary, Editor.js, Vercel, Netlify

Databases: Firebase Firestore, MongoDB, MySQL (basic)

PROJECTS

Diabetes Prediction using ML Algorithms — [View →](#)

Academic ML project on the Pima Indians Diabetes dataset (768 records, 9 features). End-to-end pipeline from data preprocessing to multi-model evaluation.

- Implemented and compared 5 classifiers: Logistic Regression, KNN, Decision Tree, Random Forest, and SVM — Random Forest achieved the best AUC of 0.83.
- Built and trained an Artificial Neural Network (ANN) using TensorFlow/Keras with 2 hidden layers, reaching 75% test accuracy over 100 epochs.
- Handled missing data by replacing invalid zeros with column means; scaled features using StandardScaler; visualized results via ROC curves, confusion matrix, and correlation heatmap.

Stack: *Python, scikit-learn, TensorFlow / Keras, pandas, NumPy, Matplotlib, Seaborn, Google Colab*

Medium-Style Blogging Platform — [View →](#)

Internship project at P2P Clouds. A full-featured blogging platform replicating Medium's core experience.

- Delivered full-stack features: auth, profile management, blog CRUD, image uploads, comments, likes, and category filtering — across 5+ major feature modules.
- Third-party API integration pattern mirrors LLM/AI API integration: async calls, error handling, token management.
- Rich-text editing via Editor.js; responsive, performant UI with Cloudinary-powered media management.

Stack: *Next.js, React.js, Tailwind CSS, Firebase, Cloudinary, Redux Toolkit, Editor.js*

Portfolio Website — [View →](#)

- Personal site showcasing projects, skills, and resume with a fully responsive layout and smooth navigation.
- Includes About, Skills, Projects, and Contact sections with form validation via JavaScript.

Stack: *HTML, CSS, Bootstrap, JavaScript*

Password Generator App — [View →](#)

- React SPA that generates strong passwords based on user-selected criteria (length, symbols, numbers).
- Features copy-to-clipboard, password strength indicator, and a clean Tailwind-styled UI.

Stack: *React.js, Tailwind CSS, JavaScript*
